Pressure gauges

Without a good pressure gauge, well, you're a bit lost. What pressure do we normally spray at? Is our pressure creeping up? Is our pressure too low for some reason? What's the problem with our sprayer?

All operators should be taught what pressure your sprayer should be operating at (a range) so they can keep an eye out if things go wrong. Isometric gauges are very useful – providing a clearer view of different pressure ranges within the one gauge.

Prices range from \$25 to \$76 (plus P&P), so they are a very inexpensive item that could save your bacon!

Options include:

	Item	Description	Maximum pressure		
			BAR	KpA	PSI
	908006	40mm gauge, ideal for 12-volt pumps, back entry	6	600	90
	1426	Isometric gauge (as pictured left) 63mm, 1/4" bottom entry	25	2,500	360
	1425	Standard gauge, 63mm 1/4" bottom entry	25	2,500	360
	1430	Standard gauge, 63mm 1/4" bottom entry	40	4,000	580
	1432	Standard gauge, 63mm 1/4" bottom entry	60	6,000	870
	1602	Standard gauge, 100mm 1/4" bottom entry	25	2,500	360
	1611	Standard gauge, 100mm 3/8" bottom entry	16	1,600	230
	1612	Standard gauge, 100mm 3/8" bottom entry	25	2,500	360
	1660	Standard gauge, 100mm 3/8" bottom entry	60	6,000	870
	1626	Isometric gauge, 100mm, 3/8" bottom entry	25	2,500	360
